

## Presentation Categories

### **First-to-Podium Presentation Only**

The First-to-Podium Presentation category is reserved exclusively for work that is being presented for the first time. Only truly original, practice-enhancing research, emerging data, or novel innovations that have not been presented, published, posted, or shared in any scientific, educational, or public forum are eligible.

To maintain the integrity of this high-visibility category and to respect the valuable time and expertise of our clinician reviewers, the following requirements will be enforced:

- Submissions must represent new and unpublished work.
- Content must not have been previously presented at any conference, symposium, webinar, or event, etc.
- Content must not have been published in any journal, digital platform, or similar outlet.
- Submissions should include novel insights or innovative approaches with the potential to change or significantly enhance clinical practice.

Any submission entered in the First-to-Podium category that does not meet all eligibility criteria will be declined without an opportunity to resubmit. Our reviewers—who are clinicians volunteering for their time and expertise—evaluate each submission with great care. We ask all submitters to adhere to these guidelines.

Embargo Note—Abstracts chosen by the Reviewer Committee for First-to-Podium presentation are embargoed until the start of the session in which they are featured.

### **Oral Presentation Only**

Oral presentations feature the highest-scoring abstracts. Primary contacts/submitters will be notified about selection for an Oral Presentation by the acceptance deadline. Each presentation will be 10 minutes including presentation time and Q&A. Oral presenters may also present their abstract as a poster in the Poster Hall.

### **Poster Presentation Only**

Posters are displayed in the Poster Hall on bulletin boards measuring 48 inches high by 96 inches wide. Printed posters will be available for viewing during all Poster Hall hours. ePosters (PDFs) will also be accessible through screens within the conference space and via the mobile app.

### **Poster Presentation if Not Selected for First-to-Podium or Oral Presentation**

For your abstract to still be considered for a poster presentation, should it not be selected for podium presentation, choose the category Poster Presentation if Not Selected for First-to-Podium or Oral.

### **RAPID-FIRE: Poster Talks**

Each presentation is 5 minutes including Q&A. This session is for CE credit and requires additional paperwork to be completed. Commercial interests are not eligible to participate. The ACCME, ACPE, ANCC and CPME defines a “commercial interest” as any entity producing, marketing, re-selling, or distributing health care goods or services consumed by, or used on, patients with the exemption of nonprofit or governmental organizations and non-healthcare related companies.
